40 UNDER 40 MOST INNOVATIVE FOUNDERS

This year's list of the leaders in innovation and technology

ULTIMATE GETAWAYS

The hottest escapes, from the British Virgin Islands to Africa

PLUS:

Chris Hollod shares how he sources investments from Instagram; the 36-year-old **Hermès** designer taking the design world by storm; how a 158-year-old spirits company keeps 200 brands fresh and hip; the biggest players in **philanthropy**; and the **top VC funds** in Los Angeles

SPECIAL SECTION:

Why Salt Lake City is being coined "Silicon Slopes"

Visionaries of the Year

WALTER DRIVER AND JAVIER FERREIRA

While most tech companies are defined by solitary leaders, **Scopely** has taken a different path. Led by two co-CEOs, the company has accelerated growth beyond just the L.A. tech scene and into the mobile gaming universe, with an estimated value of \$1.7B

Farther, Faster

Make room on your bucket list.

By Carolyn Meers

Luxury jet-tour operator TCS World Travel has just announced a number of enticing new itineraries that span the planet. Throughout 2020, explore the world on TCS's custom Boeing 747 private jets (which can carry up to 76 passengers) and their Airbus A318-100 private jet (which seats up to 28). Upcoming itineraries include multi-day excursions traipsing Northern Europe, Australia, New Zealand, Brazil, and Southern Africa, to name a few. The grandest adventure? A 25-day "Around the World" trip to the world's most iconic destinations, from Machu Picchu and the Taj Mahal to the Easter Islands and Tanzania's Serengeti.

Come 2021, a new 52-seat Airbus A321LR will take flight, deliberately designed to nimbly touch down in remote locales traditionally unreachable by commercial airliners. Powered by state-of-the-art NEO engines, the A321LR burns 20 percent less fuel than current Boeing 757s, and its extended range tops eight hours (approximately 4,000 miles). Its plush interiors will be outfitted with Italian-made leather flat-bed seats and the largest cabin by height and width of any single-aisle aircraft.

Fly Buy

Fresh new flights, curated experiences, health-focused programs for pilots—JetSuite and hop-on air carrier JSX are taking off.

By Carolyn Meers

This April, JetSuite—a charter air company founded in 2009—will team up with public charter flight operator JSX to launch a new set of flights between cities on the West Coast and the southwestern U.S. With five daily round trips on 30-seat jets from private terminals that easily sidestep airport crowds, routes will ferry clients between Portland International Airport and Seattle's King County International Airport-Boeing Field. JSX also recently added Phoenix as a destination, with flights to/from Burbank, Las Vegas, and Oakland. And, to make buying your season ski pass ahead of time that much more appealing, four-year-old JSX will offer seasonal flights to Mammoth Lakes from both Burbank and Orange County this coming December.

Recently, JetSuite joined forces with luxury travel company Embark to launch JetSuite Experiences, one-of-a-kind curated excursions

around the globe. Get whisked away to take cooking lessons at Thomas Keller's French Laundry in Napa. Go dog-sledding in the backwoods of Aspen. Mountain bike in Arizona's Sonoran Desert. These are just a few of the program's top-tier getaways.

In a more health-focused, forward-thinking move, JetSuite has partnered with global recovery company Hyperice to give pilots access to their products and services in an effort to support their wellness, recovery, and performance. Hyperice's portable inflammation-fighting devices, popular among professional athletes, are designed to help relax and loosen muscles, increase circulation, and enhance range of motion and flexibility—all essential to help with multiple short-haul flights daily, as well as long-haul treks.
